

International Exposure App

Purpose

The purpose of the **International Exposure App** is to enable NWU to report on submissions for the University ranking process.

The qualifying criterion is that employees must have lived abroad for a period of 6 months or longer on a continuous period. It does not only have to be academic exposure.

On the International Exposure App you will be able to capture the following information

- Country
- Period that you lived abroad
- Capacity

You will also be able to view the information submitted but will not be able to remove any submissions.

If a specific capacity is not available on the application please log a ticket so that it can be added by P&C.

Need help?

The **International Exposure App** is available from the DIY Services Portal. Open the browser and navigate to www.nwu.ac.za. Click on the “DIY Services” link in the page footer.

Sign in with your NWU number and network password. Click on the “Staff” link at the top of the page, just below the page header. Click on the **International Exposure App** icon.

To sign out, click on your username and then Sign Out in the page header.
